CHECKLIST

Finishing your coding project this week

- [ ] Write one sentence describing the smallest version that works
- [ ] Open the editor and write the simplest version of the first task
- [ ] Commit your work at the end of the session with a note on what's next
- [ ] Remove every feature not in your one-sentence description
- [ ] Set up your environment so starting takes one click
- [ ] Write a failing test for the next behaviour before you stop
- [ ] Spend one session experimenting with new libraries before using them
